

**LR3 Bull Bar: 3432150**

Replaces the stock bumper assembly. Makes a great winch or light mount, sold separately. Airbag compatible. Comes in satin black, can be painted to match the vehicle as shown.

Note: this bar is considerably more difficult to fit than other ARB bars due to the construction of the LR3 bodywork. We strongly recommend that fitting be done by an experienced 4WD shop with fabrication skills. We can ship directly to the shop.

Protects the entire front end of your LR3 from deer, brush, rocks, or snow banks. All steel, looks great!

Sold Out-under bumper guard

Sold Out-swing away tire carrier

**LR3 Serious off road gear:**

- Under bumper guard BPR1016
- Underbody guard Sold Out
- Trans/T-case guard BPR1018
