

Item Pricing

We base our prices on actual landed costs, which means they change frequently. Other places that print paper catalogs with printed prices often inflate their prices to accommodate fluctuations. The way we do it is harder but it usually results in a lower price for you.

There are two ways to check prices on line. You can use the 'Price Lookup' feature by clicking the button on the left column of our home page. Once opened, this can be used on any page on any web site so that you can easily compare prices. Make sure the brands or quality level are the same before making a decision based on price. Sometimes the lookup feature can be a little slow, depending on your connection. You can also download our PDF Price List, which is updated monthly. It can be found on the home page of any catalog.

Can't find it in the catalog? Please ask! We special order from the UK.

Know Your Truck

To accurately buy parts for your specific vehicle, you will need to know what engine your truck has, and use this information when searching this catalog for parts.

The 7th digit of the VIN (Vehicle Identification Number) specifies which engine the vehicle is equipped with. You can find your VIN in a number of locations, including under your windshield on the drivers side, the sticker on your drivers door, and on the RH suspension strut tower.

VIN	VIN Code 1	VIN Code 3	VIN Code 5
