

### Front Bull Bars

The body of your Range Rover is not as tough as the rest of your truck! Plastic and aluminum predominate, and the replacement parts are expensive.

The ARB Bull Bar replaces the stock bumper completely. The deep draw stamped steel construction makes them relatively light, while providing serious protection from deer, rocks, and brush. Finish is satin black, but can be painted to match your color before mounting. Great support for a winch and off road lighting.

Fits '87-'94 models. Special order only.

### ARB Roof Rack

Heavy duty ARB 1/2 racks can take the load and the punishment of off road use, unlike the cheaper bolt-on baskets. Rack assembly weighs 80 lbs. assembled, handles 200 lbs. The basket can be separated from the legs for storage and limited vertical clearance garages. Also reduces wind noise over the front seats. Does not obstruct the sun roof. Wide foot drip rail mouting. Complete rack requires both.

Basket 380030M Mount kit 3700060

### Old Man Emu Suspension

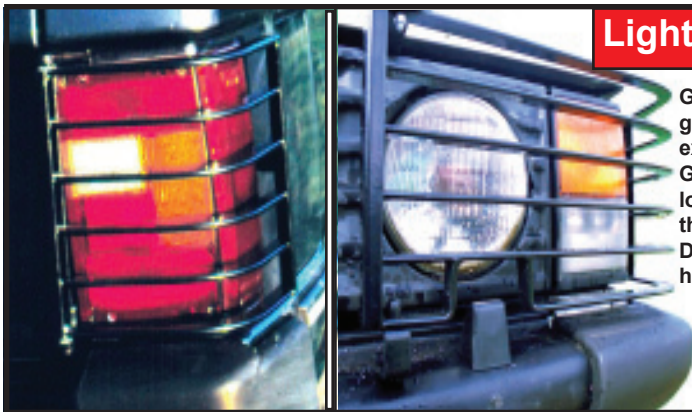

**Springs,  
Shocks,  
Steering  
Dampers**

Refer to our Offroad Section or page 7 for RR Classic product data and applications.

We also provide air suspension conversions with Emu springs and shocks.

America's first Emu dealer!

### Light Guard

Good quality aftermarket guards to protect your expensive lenses. Genuine fronts are no longer available, and these mount differently. Drilling required, original holes will not match.

Front set: GAR020  
Rear set: GAR016

special order only

### Steering Protector

Your steering tie rods are vulnerable: any serious offroad work requires a good steering protector.

Ours use an aluminum plate with steel mounts, straight bolt on. **GARS10**
