--------------------------	---------

Factory parts catalogs

Provides a full listing of parts with their factory part numbers and drawings of assemblies not found in the workshop manual.

Series IIA	RTC9840CC
Series III	RTC9841CE
Optional equipment for Series IIA, III	RTC9842CE

Series Manuals on CD

Each CD is based around a model range and includes original shop and parts manuals plus special USA spec suppliments that have been long out of print. MS Windows only

Series 1, 1948-1958	LHP19
Series II, 1958-1961	LHP20
Series IIA & IIB, 1961-1971	LHP21
Series III, 1971-1985	LHP22

The Power Bleeder is the perfect answer for those troublesome 109 CB systems, as well as all series hydraulic systems.

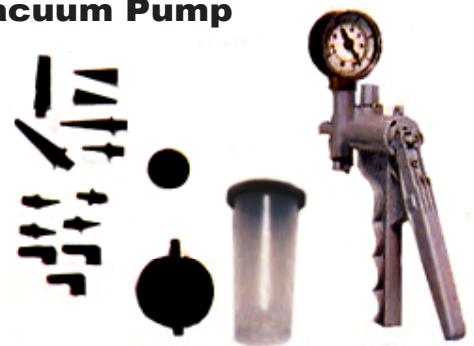

The basic kit comes with a universal adapter that works fine on all series applications. A separate 'euro' adapter can be ordered for any cars you might have around the house with a metric threaded cap.

Here's how it works: add brake fluid to the tank, attach the fitting where the fluid cap goes, pump up the tank pressure, then go around and open the bleed screws individually. This now becomes a one person operation, and you don't have to top up the truck's reservoir each time: the tank holds enough to purge a complete system.

For professional results at home, you will use this tool over and over on all your vehicles!

Universal Power Bleeder (fits all series)	0101
Euro adapter	0100
(For vehicles with metric threaded reservoirs)	

Mityvac Vacuum Pump

Mityvac is a hand held vacuum pump system useful for vacuum bleeding of hydraulic systems, testing power brake boosters, distributor vacuum advance systems plus an large number of other uses.

Mityvac	386-215
